PREFACE

This index of the Qur'ān is prepared in a new way and new style. It has added absolutely new dimensions to the subject. It is hoped that it will be highly commended in intellectual circles all over the Muslim world.

The object of preparing this index is to help the Muslim scholars and others to find all the relevant verses under one heading. It is hoped that this book will be of great value to such people who intend to do research work in their own fields in the light of this Qur'ānic knowledge.

An effort is made in this book to explore new subjects in the Qur'ān to meet the demands of the age, *e.g.*, space, life in space, origin of life, genetics, psychology, educational psychology, principles of education, philosophy of education, physics, arithmetic, industry, economics, physical geography, economic geography, geology, dramatic effect etc.
